Subject: RE: Relocation of House Blocks at Gladstone

Petri, I have blocks (on pallets) and rebar located in the vicinity of the Colorado Goldfield building. I also have blocks stockpiled to the West which are now close to the debris pile from the clearing of the upstream culvert. If I understand correctly, the relocation(s) will be to the south side of the building. I postponed this week's delivery (today) based upon my conversation with Steve because I heard from Mike on Sunday the cement mixers were going to be delivering today and proceeding to the Red and Bonita. I wasn't able to get the blocks delivered earlier due to the culvert being washed out and the road (CR110) collapsing. I am planning on the latest block delivery (full semi trailer load) for tomorrow so I will need to have the trucker and my construction crew know where to unload. We will shuttle blocks, ultimately to my construction site, as Steve is aware. Thanks for your help.

Mace Pemberton, P.E.

Mace, here's the plan/map to relocate the block. Hopefully this will work for you. Talk to Elliott if you need more detail.

Thanks,
Steve
